Deliverable 1 – Problem Analysis & Project Planning

Team Name: *e.g. Software Sharks*

Team Members

Name	ID	Role

---

1. Project Title

Write the proposed name of your system (e.g., "Student Services System", "Online Clinic Booking System").

---

2. Problem Statement

Describe the real-world problem your system aims to solve.
Explain what is currently missing, inefficient, or frustrating about the existing process.
Example: "Currently, students must visit multiple offices to complete registration tasks, leading to delays and errors."

---

3. Project Scope

Define the boundaries of your project — what it will and won't include.

- **In Scope:** List the main features your system will provide.
- **Out of Scope:** Mention what will **not** be handled (e.g., advanced analytics, third-party integrations).

In Scope	Out of Scope

4. Project Objectives

List 3–6 clear objectives that describe what your project will achieve.
(Use measurable and action-oriented statements.)
Examples:

- To automate appointment scheduling for patients.
- To reduce manual paperwork for staff.
- To allow users to track order status online.

---

5. Target Users / Stakeholders

Identify who will use or benefit from your system.
Examples:

- Students and instructors (for a learning system)
- Customers and delivery drivers (for an ordering app)
- Admins, staff, and patients (for a hospital system)

User Type	Role in System

---

6. Project Infrastructure Requirements

Describe what tools, platforms, or technologies you plan to use.
Separate into software, hardware, and other resources if needed.

Type	Example
Software	e.g., Visual Studio Code, MySQL
Hardware	e.g., Standard PC, Server, Network
Other	e.g., Internet access, mock dataset

---

7. Software Process

Specify the software process that you are going to use. If it a plan driven or agile and, why? Specify the software process model and provide a justification for your choice.

8. References (if any)

List any sources, articles, or systems you studied while defining the problem.

---

9. Approval Section (for Instructor use)
