

FCAI ANU Materials – Semi Seniors – Chapter 1 – Visual Programming

Multiple-Choice Questions on Introduction to Visual C#

1. What is Visual Studio primarily described as in the lecture?

- A. A simple text editor
- B. A professional integrated development environment (IDE)
- C. A web browser
- D. A graphics design tool

Answer: B. A professional integrated development environment (IDE)

2. Which languages can Visual Studio be used to create applications with, besides Visual C#?

- A. Java and Python
- B. Visual Basic and C++
- C. HTML and CSS
- D. SQL and PHP

Answer: B. Visual Basic and C++

3. What is the first step to creating a new project in Visual Studio?

- A. Click Save All
- B. Open Visual Studio and select Create a new project from the Start Window
- C. Open the Toolbox
- D. Change the form's Text property

Answer: B. Open Visual Studio and select Create a new project from the Start Window

4. What type of application is selected in the lecture for creating a new project?

- A. Console App
- B. Windows Forms Application
- C. Web Application
- D. Class Library

Answer: B. Windows Forms Application

5. What is the default name filled in the project name text box when creating a new Windows Forms App?

- A. MyFirstProject
- B. Project1
- C. WindowsFormsApp1
- D. AppDefault

Answer: C. WindowsFormsApp1

6. What is a solution in Visual Studio?

- A. A single file containing code
- B. A container that holds a project
- C. A type of control
- D. An event handler

Answer: B. A container that holds a project

7. By default, what is the relationship between the solution name and project name?

- A. They are always different

- B. The solution name is the same as the project name
- C. The solution name is longer
- D. There is no relationship

Answer: B. The solution name is the same as the project name

8. Where is the project name displayed after creating a new project?

- A. In the Toolbox
- B. In the title bar at the top of the Visual Studio window
- C. In the Properties window
- D. In the menu bar

Answer: B. In the title bar at the top of the Visual Studio window

9. Which windows appear within the Visual Studio environment as mentioned in the lecture?

- A. Code Editor, Debugger, Compiler
- B. Designer window, Solution Explorer window, Properties window
- C. Toolbox, Menu Bar, Toolbar
- D. Form, Button, Label

Answer: B. Designer window, Solution Explorer window, Properties window

10. How do you open the Solution Explorer window if it is not visible?

- A. Click File > Open
- B. Click View on the menu bar, then Solution Explorer
- C. Press F5
- D. Double-click the form

Answer: B. Click View on the menu bar, then Solution Explorer

11. What feature allows windows in Visual Studio to be displayed as tabs along the edges when turned on?

- A. Auto Save
- B. Auto Hide
- C. Auto Size
- D. Auto Align

Answer: B. Auto Hide

12. How do you turn Auto Hide on or off for a window?

- A. Click the pushpin icon in the window's title bar
- B. Press Ctrl + H
- C. Right-click the window and select Hide
- D. Change the Visible property

Answer: A. Click the pushpin icon in the window's title bar

13. What appears below the menu bar in Visual Studio?

- A. The Toolbox
- B. The standard toolbar
- C. The Designer window
- D. The code editor

Answer: B. The standard toolbar

14. Which toolbar button moves to the previously active tab in the Designer window?

- A. Navigate Forward
- B. New Project
- C. Navigate Backward
- D. Save All

Answer: C. Navigate Backward

15.What does the Undo button on the toolbar do?

- A. Saves the project
- B. Undoes the most recent operation
- C. Starts debugging
- D. Configures the project

Answer: B. Undoes the most recent operation

16.Which button lets you select the platform on which the application will run?

- A. Solution Configurations
- B. Solution Platform
- C. Start Debugging
- D. Find

Answer: B. Solution Platform

17.What is the purpose of the Toolbox window?

- A. To edit code
- B. To select controls for the user interface
- C. To view properties
- D. To explore solutions

Answer: B. To select controls for the user interface

18. Where does the Toolbox typically appear in Visual Studio?

- A. On the right side
- B. On the bottom
- C. On the left side
- D. On the top

Answer: C. On the left side

19. What is a ToolTip in Visual Studio?

- A. A button on the toolbar
- B. A small box with a description that pops up when hovering over a button
- C. A property in the Properties window
- D. A control in the Toolbox

Answer: B. A small box with a description that pops up when hovering over a button

20. What is a Visual C# project composed of?

- A. Only code files
- B. Several related files such as code and images
- C. A single image
- D. Only forms

Answer: B. Several related files such as code and images

21. What can a solution hold in Visual Studio?

- A. Only one project
- B. One or more Visual C# projects
- C. Only images
- D. Only code files

Answer: B. One or more Visual C# projects

22. Why might you store several related projects in the same solution?

- A. For small organizations only
- B. For convenience in large organizations
- C. To reduce file size
- D. To hide code

Answer: B. For convenience in large organizations

23. How do you display a project's form in the Designer if it's not shown?

- A. Double-click the form
- B. Right-click Form1.cs in Solution Explorer and click View Designer
- C. Press F5
- D. Click the Toolbox

Answer: B. Right-click Form1.cs in Solution Explorer and click View Designer

24. What is the initial size of a form in pixels?

- A. 200 x 200
- B. 300 x 300
- C. 400 x 400
- D. 100 x 100

Answer: B. 300 x 300

25.What indicates that an object is selected in the Designer?

- A. A solid line around it
- B. A bounding box with sizing handles
- C. A red color
- D. A tooltip

Answer: B. A bounding box with sizing handles

26.What is the default name of the blank form created in a new project?

- A. MainForm
- B. Form1
- C. MyForm
- D. DefaultForm

Answer: B. Form1

27.What determines the appearance and characteristics of a GUI object?

- A. Its name
- B. Its properties
- C. Its code
- D. Its location

Answer: B. Its properties

28.Where are an object's properties displayed when selected?

- A. In the Toolbox
- B. In the Properties window

- C. In the code editor
- D. In the menu bar

Answer: B. In the Properties window

29.What does the Text property of a form determine?

- A. The form's size
- B. The text in the title bar
- C. The form's color
- D. The form's name

Answer: B. The text in the title bar

30.Changing a form's Text property does what to its name?

- A. Changes the name
- B. Does not change the name
- C. Deletes the name
- D. Hides the name

Answer: B. Does not change the name

31.How can you change a form's size using the Properties window?

- A. Edit the Name property
- B. Edit the Size property
- C. Edit the Text property
- D. Edit the Visible property

Answer: B. Edit the Size property

32.How do you add a control to a form from the Toolbox?

- A. Right-click it
- B. Double-click it or drag it
- C. Press Enter
- D. Change its properties

Answer: B. Double-click it or drag it

33.How do you delete a control from a form?

- A. Select it and press Delete
- B. Change its Visible property to False
- C. Resize it to zero
- D. Change its name

Answer: A. Select it and press Delete

34.What is the default name for the first Button control created?

- A. buttonDefault
- B. button1
- C. myButton
- D. clickButton

Answer: B. button1

35.What property holds the text displayed on a Button's face?

- A. Name
- B. Size
- C. Text
- D. Visible

Answer: C. Text

36.Changing a Button's Text property affects what?

- A. Its name
- B. The text on its face
- C. Its size
- D. Its visibility

Answer: B. The text on its face

37.What is the first character rule for C# identifiers (control names)?

- A. Must be a digit
- B. Must be a letter or underscore
- C. Must be a space
- D. Must be a symbol

Answer: B. Must be a letter or underscore

38.Can control names contain spaces in C#?

- A. Yes
- B. No
- C. Only at the end
- D. Only if quoted

Answer: B. No

39.What naming convention is recommended for multi-word control names?

- A. Snake case
- B. Camel case

- C. Pascal case
- D. Kebab case

Answer: B. Camel case

40. In camelCase, how is the first word written?

- A. All uppercase
- B. All lowercase
- C. First letter uppercase
- D. With underscores

Answer: B. All lowercase

41. What file contains the application's start-up code in a C# project?

- A. Form1.cs
- B. Program.cs
- C. Main.cs
- D. Startup.cs

Answer: B. Program.cs

42. What should you not modify in the Program.cs file?

- A. The comments
- B. The contents, as it could prevent execution
- C. The namespace
- D. The class name

Answer: B. The contents, as it could prevent execution

43. Which file contains code associated with the Form1 form?

- A. Program.cs
- B. Form1.cs
- C. Designer.cs
- D. App.cs

Answer: B. Form1.cs

44.How is C# code primarily organized?

- A. Functions, loops, variables
- B. Namespaces, classes, methods
- C. Forms, controls, properties
- D. Files, folders, projects

Answer: B. Namespaces, classes, methods

45.What do using directives at the top of a C# file indicate?

- A. Classes to create
- B. Namespaces from .NET Framework to use
- C. Methods to call
- D. Controls to add

Answer: B. Namespaces from .NET Framework to use

46.What marks the beginning of a namespace in code?

- A. class namespaceName
- B. namespace namespaceName
- C. using namespaceName
- D. public namespaceName

Answer: B. namespace namespaceName

47.What is a class declaration in C#?

- A. A container for methods
- B. A container for namespaces
- C. A group of statements
- D. An event handler

Answer: A. A container for methods

48.What is the entry point method in a form class?

- A. Main()
- B. public Form1()
- C. InitializeComponent()
- D. Click()

Answer: B. public Form1()

49.How do you switch between the code editor and Designer using tabs?

- A. Click Form1.cs for code, Form1.cs [Design] for Designer
- B. Press F7 for code, F6 for Designer
- C. Right-click and select
- D. Use the menu bar

Answer: A. Click Form1.cs for code, Form1.cs [Design] for Designer

50.How can you detach the code editor to see it and the Designer simultaneously?

- A. Press Ctrl + D

- B. Drag the code editor tab to another location
- C. Click View > Detach
- D. Change Auto Hide

Answer: B. Drag the code editor tab to another location

51.What is an event handler?

- A. A property of a control
- B. A method that executes when a specific event occurs
- C. A namespace
- D. A class declaration

Answer: B. A method that executes when a specific event occurs

52.How do you create a Click event handler for a button?

- A. Write it manually in code
- B. Double-click the button in the Designer
- C. Change the Click property
- D. Use the Toolbox

Answer: B. Double-click the button in the Designer

53.What method displays a message box?

- A. Label.Show()
- B. MessageBox.Show()
- C. Form.Message()
- D. Button.Display()

Answer: B. MessageBox.Show()

54. In the Hello World app, what is the form's Text property set to?

- A. Hello World
- B. My First Program
- C. Display Message
- D. Form1

Answer: B. My First Program

55. What is the Button's Name property in the Hello World app?

- A. button1
- B. displayButton
- C. messageButton
- D. helloButton

Answer: C. messageButton

56. What statement is written in the Hello World app's event handler?

- A. `MessageBox.Show("Hello World");`
- B. `Label.Text = "Hello World";`
- C. `this.Close();`
- D. `Visible = true;`

Answer: A. `MessageBox.Show("Hello World");`

57. What is a Label control used for?

- A. To input text
- B. To display text
- C. To show images

- D. To close the form

Answer: B. To display text

58.How do you change the font of a Label's text?

- A. Edit Text property
- B. Click ellipses in Font property
- C. Set AutoSize to True
- D. Change BorderStyle

Answer: B. Click ellipses in Font property

59.What BorderStyle value outlines the Label's text with a thin border?

- A. None
- B. FixedSingle
- C. Fixed3D
- D. Auto

Answer: B. FixedSingle

60.What happens when a Label's AutoSize is True?

- A. It cannot be resized manually
- B. It becomes invisible
- C. It centers the text
- D. It adds a border

Answer: A. It cannot be resized manually

61.What TextAlign value aligns text in the middle center of a Label?

- A. TopLeft

- B. MiddleCenter
- C. BottomRight
- D. MiddleLeft

Answer: B. MiddleCenter

62.Can numbers be assigned directly to a Label's Text property without quotes?

- A. Yes
- B. No, they must be strings
- C. Only if positive
- D. Only in code

Answer: B. No, they must be strings

63.How do you clear a Label's text in code?

- A. label.Text = null;
- B. label.Text = "";
- C. label.Visible = false;
- D. label.AutoSize = false;

Answer: B. label.Text = "";

64.In Example 1, what is displayed when the button is clicked?

- A. Hello World
- B. Fundamentals of Programming 2
- C. Course Name
- D. Show Answer

Answer: B. Fundamentals of Programming 2

65.What is the purpose of a PictureBox control?

- A. To display text
- B. To display a graphic image
- C. To input data
- D. To close the form

Answer: B. To display a graphic image

66.How do you select an image for a PictureBox?

- A. Edit Text property
- B. Click ellipses in Image property and import
- C. Set Visible to true
- D. Change SizeMode

Answer: B. Click ellipses in Image property and import

67.What SizeMode value resizes the image to fit without stretching?

- A. Normal
- B. StretchImage
- C. Zoom
- D. AutoSize

Answer: C. Zoom

68.What does the Visible property do for a PictureBox?

- A. Changes its size
- B. Determines if it's shown at runtime

- C. Sets the image
- D. Aligns the text

Answer: B. Determines if it's shown at runtime

69. In Example 2, what happens when clicking the cat image?

- A. Displays "Hello World"
- B. Displays "Hello I'm a cat"
- C. Flips the card
- D. Shows a flag

Answer: B. Displays "Hello I'm a cat"

70. In Example 3, how many PictureBox controls are used?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: C. 3

71. What is displayed when clicking the Egypt flag in Example 3?

- A. Palestine
- B. UAE
- C. Egypt
- D. Flag

Answer: C. Egypt

72. In Example 4, what is the initial Visible setting for cardFacePictureBox?

- A. True
- B. False
- C. Auto
- D. None

Answer: B. False

73.What statement closes an application's form?

- A. this.Exit();
- B. this.Close();
- C. Form.Close();
- D. Application.Close();

Answer: B. this.Close();

74.What starts a single-line comment in C#?

- A. /*
- B. //
- C. #
- D. --

Answer: B. //

75.What encloses a block comment in C#?

- A. // and //
- B. /* and */
- C. # and #
- D. -- and --

Answer: B. / and /

76. In the lecture, what is the email in the template?

- A. info@example.com
- B. example@example.com
- C. support@example.com
- D. admin@example.com

Answer: B. example@example.com

77. What button saves all files in the current project?

- A. Save
- B. Save All
- C. Undo
- D. Redo

Answer: B. Save All

78. What does the Find button on the toolbar do?

- A. Starts debugging
- B. Searches for text in code
- C. Creates a new project
- D. Configures platform

Answer: B. Searches for text in code

79. Why should you not modify Program.cs?

- A. It prevents compilation
- B. It could prevent execution

- C. It deletes the project
- D. It hides the form

Answer: B. It could prevent execution

80.What is the default AutoSize for a Label?

- A. False
- B. True
- C. None
- D. Auto

Answer: B. True

81.What TextAlign is default for Labels?

- A. MiddleCenter
- B. TopLeft
- C. BottomRight
- D. MiddleLeft

Answer: B. TopLeft

82.In Example 1, what is answerLabel's initial Text?

- A. Fundamentals of Programming 2
- B. Empty
- C. What is the name of this course?
- D. Show the Answer

Answer: B. Empty

83.What is the SizeMode for flags in Example 3?

- A. Normal
- B. StretchImage
- C. Zoom
- D. CenterImage

Answer: C. Zoom

84. In Example 4, what happens when clicking Show the Card Face?

- A. Hides back, shows face
- B. Shows back, hides face
- C. Closes form
- D. Displays message

Answer: A. Hides back, shows face

85. What is the web address in the template?

- A. www.example.org
- B. www.example.com
- C. www.example.net
- D. www.example.edu

Answer: B. www.example.com

86. What is the pushpin icon for?

- A. Saving files
- B. Turning Auto Hide on/off
- C. Resizing windows
- D. Adding controls

Answer: B. Turning Auto Hide on/off

87.What is the default BorderStyle for Labels?

- A. FixedSingle
- B. Fixed3D
- C. None
- D. Auto

Answer: C. None

88.How do you import an image for PictureBox?

- A. Drag from desktop
- B. Click Import in Select Resource
- C. Edit Text property
- D. Set Visible

Answer: B. Click Import in Select Resource

89.What SizeMode clips large images?

- A. Zoom
- B. Normal
- C. AutoSize
- D. StretchImage

Answer: B. Normal

90.What does CenterImage SizeMode do?

- A. Resizes to fit
- B. Centers without resizing

- C. Stretches
- D. Auto resizes control

Answer: B. Centers without resizing

91.To make a PictureBox clickable, what do you create?

- A. Text property
- B. Click event handler
- C. SizeMode
- D. BorderStyle

Answer: B. Click event handler

92.In Example 2, what is the PictureBox name?

- A. imageBox
- B. catPictureBox
- C. clickableImage
- D. petBox

Answer: B. catPictureBox

93.What is countryLabel's TextAlign in Example 3?

- A. TopLeft
- B. MiddleCenter
- C. BottomRight
- D. MiddleLeft

Answer: B. MiddleCenter

94.In Example 4, what is cardBackPictureBox's initial Visible?

- A. False
- B. True
- C. Hidden
- D. None

Answer: B. True

95.What statement sets Visible to false?

- A. control.Visible = true;
- B. control.Visible = false;
- C. control.Hide();
- D. control.Show();

Answer: B. control.Visible = false;

96.What is a block comment example?

- A. // Comment
- B. /* Multi line comment */
- C. # Comment
- D. -- Comment

Answer: B. / Multi line comment /

97.In the Hello World writing code part, what is the event handler name?

- A. button_Click
- B. messageButton_Click
- C. form_Load
- D. app_Run

Answer: B. messageButton_Click

98.How do you run an application in Visual Studio?

- A. Press F1
- B. Press F5 or click Start Debugging
- C. Press Ctrl + S
- D. Click Save All

Answer: B. Press F5 or click Start Debugging

Wish you all the best!

Fathy.
